

Shower Head Cleaner

High efficiency cleaner and descaler.

- Dissolves limescale & hard water deposits.
- Rapidly lifts and cleans debris.
- Increases water flow in hard water areas.

Availability: 1L, 2L, 5L, 25L, 210L, 1000L

Shower Head Cleaner contains a super effective descaler to eliminate the large amounts of limescale and grime which can accumulate without a regular bathroom cleaning schedule in place.

The descaling agents contained within the Shower Head Cleaner formulation work to remove ingrained limescale and other residues which can harbour bacteria and reduce the effectiveness of shower heads.

Shower Head Cleaner has been independently tested to meet the requirements for BS EN 1276:2009 for Legionella control and is the ideal solution for routine washroom area cleaning.

Cleaning shower heads on a regular basis minimises the risk of contamination, eliminates any unpleasant odours and improves water flow through your shower heads. The product is especially effective in hard water areas where scale and hard water deposits are prevalent, but the product is also one of the most powerful Shower Head Cleaners available, making the cleaning action perfect for soft water areas too.

Shower head cleaner can also be used to clean and descale general bathroom areas on a range of surfaces including baths, sinks, showers and toilets.

Directions for use:

Use neat in hard water areas. In soft water areas Shower Head Cleaner can be diluted 50:50 with water.

Fully immerse the shower heads and any other parts to be treated in a solution of Shower Head Cleaner. Leave to work for 20 minutes or until the debris has been cleaned or softened.

Scrub and rinse well as required.

Note: Over a period of time some colour change may occur: this will not affect the performance of the product.
